

# NAC 2000 Horus

## NAC-2000 Headsets

- Headset with noise cancel microphone, boom microphone foldable and passive filter.
  - Different earcups configuration depending of the attenuation you need: NAC-Intercom N15 (SNR 28dB) or Peltor-based OPII (SNR 31dB) and OPIII (SNR 35dB).
  - Enhanced noise attenuation, especially for lower frequencies. Good noise attenuation that extends to the high frequency range provides suitable protection in most noise situations.
- PTT (Button Push to Talk) wide and responsive with silver contacts and constant pressure for optimal functioning. You can choose the PTT.
- New internal design that lets you replace the earseels (pads) when they are deteriorated, to keep intact hygiene and confort. (See hygiene KIT at Accessories category)

**Design developed by NAC-Intercom® for ULM and paragliding, EN966 certified.**

- Made in Italy with ultra-strong fiber, making it an extremely lightweight helmet but very robust and with the most strict security measures.
- Air sports EN966 certified, to ensure maximum safety.
- Optimized design to the smallest detail, paying special attention to aerodynamics, with air intakes on the top and back, which facilitate the transfer.
- Airflow System “air pipe”, which allows perspiration and air exchange to maintain “fresh ideas.”

- Thinking about the comfort of the pilot, the chin strap closure allows quick adjustment for a suitable subjectation.
- Ability to attach a large visor folding screen easy to install, with different models depending on usage (transparent or smoked).
- Hypoallergenic removable and interchangeable inner padding: to substitute another, adjust the size or just to wash it. Maximum hygiene and comfort, extending the life of the helmet.
- Change the size of the helmet simply replacing internal padding.
- One size, adjustable with pads of different thicknesses. This lets have a small stock of helmets and set the size that the customer needs at the last moment, simply including the appropriate lining. (Sizes available XS-S-M-L-XL-XXL)
- No need to remove anything to install the headset. Simply remove the inner lining and pass the cable through the groove enabled secure with tape. Then screw the headphones and go!! less than 5 minutes!
- Compatible also with all NAC-Intercom headsets, including the new wireless communication system BlueNAC-3000® with Bluetooth® technology.

# CHARLY Helmet Protection Bag

The surface of this classy microfiber bag is smooth on the outside and fleecy soft on the inside, such that its contents are ideally protected from scratches during transport. The Charly helmet and instrument bag offers enough space for one helmet plus flight instruments, gloves, etc. and features a practical drawstring closure. Dimensions: 40 x 50 cm

---

## CHARLY Insider

With its unbeatable fit and its good value for money, the Insider is still a bestseller.

This helmet is particularly popular because it offers full protection without considerably disturbing the field of view. Also, it is possible to converse with someone before and after the flight despite the chin guard. The helmet edges pulled inwards contribute to an extension of the field of view and help reduce air drag.

Insider Features:

- Thanks to a vacuum high-pressure moulding process, the aramid fiber reinforced outer shell is weight-optimized and can be produced with a constant quality. Material selection and manufacturing process ensure optimum strength and durability.
- The Insider produces little wind noise such that the radio set Vox operation works fine. The airspeed can still be assessed well as the helmet limits the hearing

ability only to a minor degree.

- The helmet shell pulled far down at the sides improves the fit on the head and allows for completely pressure-free ear pads. The wide, well padded internal chin strap also contributes to the wearing comfort.
- Aerodynamically clean without tail: The insider enables an unobstructed upward view and avoids neck injuries.
- The skin-friendly and breathable full textile interior lining (made in EU) provides for a comfortable helmet climate. The breathable padding is skin-friendly and antibacterial. Comfortable fit also for special sizes like XS and XXL.
- Reistant (paintable) stove-enameled multi-layer surface. 14 different colors respectively styles.

Weight: 650 g.

Sizes: XS=53/54, S=55/56, M=57/58, L=59/60, XL=61/62 XXL=63cm head circumference
